

PhyK-TAS transfer-risk assessment pipeline

from station archives to calibrated deploy/adapt/retrain decisions

Station archives

GHCN-D, ECA&D,
national networks

Benchmark curation

AR6 regions,
deduplication,
time splits

Fused evidence

physical regime
descriptors +
shift diagnostics

Degradation inference

fusion of models:
stacking, pooling,
monotone priors

Conformal decision

deploy / adapt /
retrain with
calibrated risk

feature-level fusion + model-level fusion + uncertainty calibration
